ERA-NET TRANSCAN JTC-2012  
Liste des projets financés**

Acronyme du projet	Titre du projet	Coordinateur européen	Responsables des équipes françaises associées
<b>Projets retenus avec équipes françaises financées par l'INCa</b>			
PREDICT	Personalized prevention of colorectal neoplasia by use of genetic variability for the prediction of efficacy and toxicity of treatment with COX-2 inhibitors and aspirin	Aber NADIR Tel Aviv Sourasky Medical Center	Robert BENAMOUZIG Hôpital Avicenne AP-HP Bobigny
Triage-MDS	TRanslational Implementation of Genetic Evidence in the management of MDS	Joop JANSEN Radboud University Medical Center Nijmegen	Pierre FENAUX Hôpital Avicenne AP-HP, Bobigny
CRC-Metabolome	Metabolomic profiles throughout the continuum of colorectal cancer	Ellen KAMPMAN Wageningen University	Augustin SCALBERT International Agency for Research on Cancer (IARC), Lyon
HLALOSS	New technologies for early detection of HLA loss leukemia relapse after allogeneic hematopoietic stem cell transplantation, and identification of relevant risk factors	Katharina FLEISCHHAUER Ospedale San Raffaele	1) Mohamad MOHTY Hôpital Saint Antoine AP-HP, Paris  2) Didier BLAISE Institut Paoli-Calmettes, Marseille
TRANSIBCCS	Development of a Comprehensive Risk Prediction Model for BRCA1 and BRCA2 mutation carriers	Matti ROOKUS The Netherlands Cancer Institute	Nadine ANDRIEU Institut Curie, Paris
<b>Projets retenus avec équipes françaises financées par la Fondation ARC</b>			
Ma.Tr.OC	Identification of molecular therapeutic targets and diagnostic/prognostic biomarkers for Malignant Transformation of Osteochondromas.	Lucas SANGIORGI IRCCS - Istituto Ortopedico Rizzoli	Valerie CORMIER DAIRE Hôpital Necker - Enfants Malades, AP-HP, Paris
EpiMark	Identifying early epigenetic predictors of breast cancer risk and their etiology determinants	Zdenko HERCEG International Agency for Research on Cancer (IARC)	1) Zdenko HERCEG International Agency for Research on Cancer (IARC), Lyon  2) Suzette DELALOGUE Institut Gustave Roussy (IGR), Villejuif

**Autres projets retenus sans équipe française**

FAMILIAL CANCER	Cancer prevention through improved familial risk assessment and gene discovery	Kari HEMMINKI German Cancer Research Center	
NanoEFfect	Nanoparticle-Enhanced molecular Fluorescence-Endoscopy for detection of early-stage colorectal adenocarcinomas	Paul DEBBAGE Medical University Innsbruck	
MesaCapp	Mesalamine for Colorectal Cancer Prevention Program in Lynch syndrome	Christoph GASCHE Medical University of Vienna
